

Equivalent Fractions

Grades 3-4 • Finding equivalent fractions and simplifying

Name: _____

Date: _____

1. What fraction is equivalent to $\frac{4}{5}$? (Multiply by 2)

Answer: _____

2. Simplify $\frac{6}{12}$ to its lowest terms

Answer: _____

3. What fraction is equivalent to $\frac{6}{8}$? (Multiply by 3)

Answer: _____

4. What fraction is equivalent to $\frac{3}{5}$? (Multiply by 2)

Answer: _____

5. What fraction is equivalent to $\frac{3}{4}$? (Multiply by 4)

Answer: _____

6. What fraction is equivalent to $\frac{3}{5}$? (Multiply by 4)

Answer: _____

7. What fraction is equivalent to $\frac{4}{7}$? (Multiply by 3)

Answer: _____

8. What fraction is equivalent to $\frac{5}{6}$? (Multiply by 3)

Answer: _____

9. What fraction is equivalent to $\frac{5}{10}$? (Multiply by 4)

Answer: _____

10. What fraction is equivalent to $\frac{3}{8}$? (Multiply by 4)

Answer: _____

Answer Key

1.	What fraction is equivalent to $\frac{4}{5}$? (Multiply by 2)	$\frac{8}{10}$
2.	Simplify $\frac{6}{12}$ to its lowest terms	$\frac{2}{4}$
3.	What fraction is equivalent to $\frac{6}{8}$? (Multiply by 3)	$\frac{18}{24}$
4.	What fraction is equivalent to $\frac{3}{5}$? (Multiply by 2)	$\frac{6}{10}$
5.	What fraction is equivalent to $\frac{3}{4}$? (Multiply by 4)	$\frac{12}{16}$
6.	What fraction is equivalent to $\frac{3}{5}$? (Multiply by 4)	$\frac{12}{20}$
7.	What fraction is equivalent to $\frac{4}{7}$? (Multiply by 3)	$\frac{12}{21}$
8.	What fraction is equivalent to $\frac{5}{6}$? (Multiply by 3)	$\frac{15}{18}$
9.	What fraction is equivalent to $\frac{5}{10}$? (Multiply by 4)	$\frac{20}{40}$
10.	What fraction is equivalent to $\frac{3}{8}$? (Multiply by 4)	$\frac{12}{32}$
